Atmel®

ATMEL
STUDIO

6

Dear Atmel Certified FAE,

You've been selected to receive this Atmel® Studio 6 Launch Box, which includes a DVD and an Atmel SAM4S Xplained Board (for Atmel's latest ARM® Cortex™-M4 processor-based microcontroller (MCU)). With the DVD containing the sales presentation, the pitch pack, and several videos showing real application examples, you'll be well equipped to demonstrate the true value delivered by Atmel Studio 6 and Atmel Software Framework (ASF).

Atmel Studio 6 and ASF not only enable easy project portability among different Atmel MCU platforms, but they also simplify project development, especially if your customers are new to Atmel. ASF consists of over 1,100 ready-to-run, fully configured project examples with source code, providing design engineers an immediate reference for their own new projects.

Start exploring Atmel Studio 6 and ASF today with the enclosed SAM4S Xplained Board.
